Timeline Dates

By www.homeschooling-ideas.com

These timeline dates are for you to cut out and use with your homeschool timeline.

There are 100 dates in all, so this timeline will fit in a 50 page blank book (using one side of a page per date).

The number of years between dates reduces as the dates get nearer the present day – this is to give you extra room in which to add historic details. If you don't like this idea, or you don't have room on your timeline – then just use the dates you need.
